

Kateryna Berehovych

Junior Front-End Developer

Well-targeted, socially active and easily organized Front-End Developer looking for an entry-level position. I have sound knowledge of HTML, CSS, JavaScript, and React. In addition to this, I have experience with implementing both individual and team projects. Also, I am ready to improve my skills during work. I am a fast learner, responsible, and ready for challenging tasks. Looking forward to using my technical knowledge to help grow your company.

Projects

Ice-cream Project [GitHub] [HTML5, CSS3]

Role: Team Lead

The website for company which produces natural ice-creams. This project has an opportunity to order on website and to see a location

Image Search Project [GitHub] [JavaScript]

Individual project

The application finds diffrent images which you search!

Film Search Project [GitHub] [React.js]

Individual project

The application finds movies and all information about them. You can read reviews and see cast.
